

GECCAC

GECCAC

GENDER EQUALITY CLIMATE CHANGE ADVOCACY CENTRE

Kyambogo University, Kyambogo
Kampala - Uganda

KEY CORE VALUES AND FUNCTIONS

- To bridge gender digital gaps for climate change services
- To promote gender based analysis or assesment matrix
- To decampaign gender based violence everywhere
- To enhance climate change outreach for gender equity
- To develop community climate change literacy culture
- To adopt gender based budgeting for gender equality
- To create climate information technology society ecology
- To ensure climate change gender equality for women and girls' entrepreneurship for economic empowerment
- To promote good practice youth, children, women, or girls for community based climate change adaptive capacity

Capacity building for local Uganda community media, science journalism, environmental education, women, or children by media advocacy communication campaigns

Enhance national and district climate communication for public awareness of all the relevant policies on climate change, climate, climate variability, weather, environment, population, human settlement, and local livelihoods

Develop multiple mass media channels for local climate information services for individual, household, community, institutional, district, national, sub and regional, or globally.

Help to bridge digital gender gaps as well as rural-urban digital divides for the media, ICT, internet, or functional literacy to all Uganda citizens, refugees, and non-citizens.

Promote refugee education from early childhood or basic education to university and tertiary education for social inclusion with a focus on practical inclusive education.

Organise voluntary programmes or project activities for the households, local community, institutional, district, national, and international volunteers with the stakeholders.

Plan and participate in regular or special community, institutional, sub-regional, regional, and international event, exhibition, conference, training, or workshop for policy or development plan implementation process.

CAPACITY BUILDING STRATEGY FOR SUSTAINABILITY

Academic institution is our common background and the current work place or destination. We are academics of multidisciplinary background including professors as well.

Local communities are our key allies as all our clients as we work with local communities during research, consultancy, student placement, or community projects.

Institutions such as universities, higher education, or schools, hospital, or health centres for our partnerships.

Civil society organisations like NGOs, CBOs, the media, or religious or faith based organisations as the targets.

Private sector bodies at urban, peri-urban, or rural locations of different types or operations are part and parcel of the objectives and work plan of the GECCAC

Public sector agencies are among primary area of focus as our programme areas are pegged to public policies.

Local government at district is their areas of special focus because they are the major implementors of the public policies especially the national development plans 2016 to 2020, 2021 to 2025 as well as the Uganda Vision 2040 with the Uganda National Planning Authority.

OUR MAJOR OBJECTIVES AND FOCUS

Policy advocacy for gender equality in climate change adaptation or mitigation at family, community, or national level

Documenting and communicating indigenous knowledge in climate change and women's contributing to successful social, economic, environment, legal, or political solutions.

Develop gender equality talents in sports to empower women, girls, children, refugees, youth, and refugees.

Plan community media activities with community planning, management, operations, or voluntary projects

Disseminate all the major programme area specific information, education, and communication materials for key stakeholder climate information sharing in home community, district, institution, regions, and nationally.

Establish pilot or research projects for community outreach or community engaged research scholarship for gender equality community based climate adaptation action and good practice for gender transformation.

OUR PROGRAMME OBJECTIVES AND ACTIVITIES

Build capacity for Uganda community media science journalism, environmental education, women, children, or local health media advocacy communication campaigns.

Enhance national and district climate communication for public awareness of all the relevant policies on climate change, climate events, climate variability, weather, environment, clean energy, population health, human settlement, and sustainable household livelihoods.

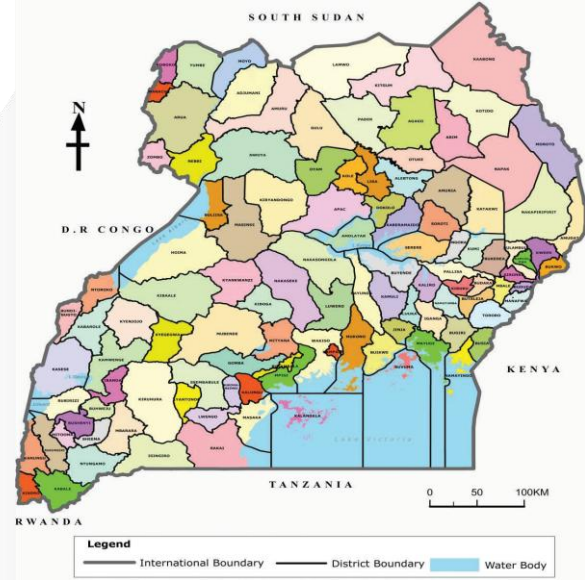

Develop multiple media channels for climate information services for individual, family and household, community, institutional, district, national, sub or regional, or globally.

Help to bridge digital gender gaps as well as rural-urban digital divides for the media, ICT, internet, PWDs, or functional literacy to all Uganda citizens and non-citizens.

Promote refugee education from basic education from early childhood education to university or tertiary education for social inclusion or inclusive education

OUR REQUEST FOR CAPACITY BUILDING SUPPORT

GECCAC is requesting for institutional capacity building Budget or financial, technical, or material support based on a specific MoU or agreement with the contributor.

Organise voluntary programmes or project activities for the households, local community, institutional, district, national, and international volunteers with the stakeholders.

Plan or participate in special local community, institutional, sub-regional, regional, and international events like local social entrepreneurship innovations, exhibitions, conferences, training, sports, or workshops.

OUR SERVICE MAJOR DELIVERY STRATEGIES

Operate a multi networked centre for gender equality in climate change advocacy communication campaigns for national - community climate change adaptive strategy.

Ensure that the local communities, companies, civil society, institutions, or associations are vigilant with skills and capacity to detect early warning signs for climate change/ climate variability drivers for early action

Promote employable vocational skills and centres for the youth, children, men, women, or girls for 2030 SDGs.

Employ Gender Based Analysis (GBA) and Gender Assessment Matrix (GAM) so as to mainstream gender equality for holistic empowerment of women and girls in socio-cultural, economic, environment, legal, or political empowerment for all - inclusive development.

GECCAC STRATEGIC PARTNERSHIPS

Our fully dedicated team of self-motivated volunteers who are professional programme coordinators, whose mandates are to: attract all key partner partners like key individual, community, CSO, agency, and government.

household, community, local and central governments, institutions, sub-regional, civil society, private or public sector, groups, sub-regional, regional, and international organisations or agencies to help achieve the UN 2030 SDGs especially SDGs 5 and 13 targets with indicators.

Our current actions are done by networking, research, local community outreach, training, conferences or workshops, meetings, teaching, mentoring, supervisions, special summer schools or courses, and publications.

We decided to coordinate direct collaborations with public-private-community partnerships and to open up new partners from individuals, groups, or civil society.

Our experiences include participation in inter-university research, conferences, training, scholarships, or visits; short-term key consultancies, curriculum development, community outreach, and international networking in individual capacities with a focus on voluntary inputs.
